

“BKKS” LLP ENVIRONMENTAL POLICY

“BKKS” LLP places high priority emphasis on environmental safety and considers environmental protection as an integral part of sustainable development within the Company.

“BKKS” LLP is fully aware of its responsibility for any possible impact of production operations on the environment, and takes obligations to ensure these production activities are controlled in a manner that will decrease adverse effect on the environment and human health.

Following the principles laid down in ISO 14001 and guided by environmental sustainability, “BKKS” LLP has defined focal points of its own Environmental policy:

- **Implementation and maintenance of an effective, rational environmental management system;**
- **Observation of legislative and other environment-oriented requirements related to its production activities;**
- **Introduction of management systems directed at sustainable improvement and prevention of soil, air, ground water and water ponds pollution;**
- **Prevention of environmental impact including harmful effect of noise, dust and transportation;**
- **Prompt and effective response to environmental accidents by enacting planned environmental contingency actions;**
- **Rational usage of natural resources, to limit generation of wastes and decrease consumption of power and water;**
- **to protect native flora and fauna, strive to preserve biodiversity;**
- **Ensure the availability of environmental activities monitoring reports for all interested parties, and have a transparent communications policy with regards to the Company’s activities and their ecological impact;**
- **Engagement of all Company and Subcontractor Company personnel in environmental activities by training of employees and managers, and familiarization of their duties and responsibilities required for implementation of the Environmental Policy requirements and achievement of environmental performance;**
- **Realization of timely preventive and corrective actions and periodically conducting ecological audits with the target of reducing and eliminating of environmental pollution risk;**
- **Ensuring periodic analysis of the policy taking into account evolving circumstances and involvement of senior management in the development of future strategy.**

BKKS are obliged to consistently carry out audit, analysis and overview of our activities aiming to reach performance improvements in all areas of environmental management system development.

“BKKS” LLP Deputy General Director

Hergen Kettwich
